

PATENT – **PROPOSED** AMENDMENT AFTER FINAL  
Response under 37 CFR 1.116  
Expedited Procedure  
Examining Group: 2874

**REMARKS**

The following amendment is submitted as a **proposal**. Reconsideration and allowance of the claims are respectfully requested. Although a Notice of Appeal has been filed, the undersigned submits the following proposed amendment for consideration by the Examiner.

As proposed, claim 1 further distinguishes over the prior art applied. Sayer et al does not teach, suggest or provide motivation for rejecting claim 1. In particular, the Sayer et al patent does not teach, suggest or provide motivation for ventilating air over a transceiver that has its end portion mounted in a wall opening to define a vent and, shielding such vent from electromagnetic interference.

In sharp contrast, Sayer et al mount the transceiver to the internal wall and do not mount a transceiver end portion to a wall opening to form a vent. Hence, there is absolutely no vent in the wall opening formed by the transceiver, let alone electromagnetic shielding of the vent. Hence, claim 1 is patentable as well as the rejected dependent claims.

PATENT – **PROPOSED** AMENDMENT AFTER FINAL  
Response under 37 CFR 1.116  
Expedited Procedure  
Examining Group: 2874

**CONCLUSION**

In view of the foregoing comments and amendments, the Applicants respectfully submit that all of the pending claims are in condition for allowance and that the application should be passed to issue.

Date: December 6, 2005

Respectfully submitted,

By:
